Sheila,

I am impressed with your language skills. Next time I think it would be a good management training thing for you to come out here. Yesterday we did have a not so happy visitor but we made it ok.

Now I do need someone to figure out who we can contact to see if we can drive through the driveway of the orchard north of Haak. It would make it much easier to drive the drill rig into the area of the right of way which is in the other side of a ditch. Eric has seen the location and should remember it. I tried to talk to people about it but did not find anyone who knew (also somewhat limited in the number of people we can find to talk to). **IT WOULD BE GOOD IF SOMEONE COULD FIGURE THIS OUT MONDAY SINCE WE PLAN TO GO TO THIS WELL EITHER LATE MONDAY OR TUESDAY** . Please let me know through email or cell phone tomorrow if Eric or someone else has found something.

Attached is a photo from drilling setup at HK-12. Mostly the same set up as the other wells, but the weather has changed a bit. Actually made many of the areas prettier.
